Before any decisions are made regarding the future of San Jose's parks, the following articles should be read and used to make decisions. Also, it would be helpful to have Dr. John L. Crompton, and visit San Jose to consult with us about the future of our parks system and the things which are missing in it. Professor Crompton teaches at Texas A&M University and specializes in economics and parks/recreation issues. He is either the author or has co-authored and researched all of the articles and books below.
